1. Start with writing the classes
 - a. Write function prototypes
 - b. Also include variable declarations
2. Include the necessary headers
3. Main
 - a. Should call the classes
 - i. Should also call the function prototypes that are in the class
 - b. Make a print menu
 - i. Use a loop to keep it cycling through
 - ii. Make pressing 0 the exit
 - c. Put a switch statement after picking which option they wanted
 - i. Include it in the loop
